2019 PES General Meeting Best of the Best Conference Paper Award Notification

Dear Authors Mithat Kisacikoglu, Emin Ucer, and Murat Yuksel:

Your paper, *19PESGM2766—Analysis of a Decentralized AIMD-based EV Charging Control*, was selected as one of four “Best of the Best” Conference Papers submitted to the 2019 PES General Meeting, on the basis of technical merit and presentation quality. Your paper was selected as a Best Conference Paper by the Smart Buildings, Loads, and Customer Systems Committee.

Of the 1200 Conference Papers submitted for this General Meeting, the technical committees selected 65 Conference Papers as the Best Conference Papers submitted to their respective committees. During the four presentation sessions of these selected papers on August 5, 2019, judges selected one paper from each session as the "Best-of-the-Best" Conference Papers. The presenting authors were recognized at the General Meeting Poster Session and the winning four papers were announced at the General Meeting Awards Dinner.

Congratulations to all the authors of this paper for your outstanding contribution to the technical activities of the Power & Energy Society at the 2019 General Meeting.

A handwritten signature in black ink, appearing to read "Farnoosh Rahmatian". The signature is fluid and cursive, with a large initial "F" and "R".
